PROJECTS / OPEN-SOURCE

CALCULATOR | [Link](#) HTML, CSS, JAVASCRIPT

TO THE MY CALCULATATOR It takes a little skill to create a calculator with basic mathematical functionalities using CSS, HTML, and JavaScript. Calculators require an interactive interface to perform basic functions such as addition, subtraction, division, and multiplication. It will need a display screen to

TO-DO APP | [Link](#) use in project html, CSS, JS

The BASIC-TO-DO-WABAPPA project is a web application built using HTML, CSS, and JavaScript. It allows users to create and manage their to-do lists with basic features such as adding, editing, and deleting tasks. The app has a simple and user-friendly interface suitable for basic task management

TRIBUTE PAGE | [Link](#) use in technolgie in html, css

The Tribute Page project is a web page built using HTML and CSS. It pays tribute to a person or entity by showcasing their life or achievements. The page is designed to be informative and visually appealing, using CSS to create a responsive and attractive layout. The project demonstrates basic HTML and CSS skills

AMZONE FRONT PAGE | [Link](#) html,css

amzone front pge using in html .css

MYNTRA UI CLONE HTML, JavaScript, React.js, and Bootstrap

I developed a fully responsive Myntra UI clone using HTML, JavaScript, React.js, and Bootstrap. The project replicates the front-end design, including navigation, product listings, and interactive elements. While it currently lacks a backend, I plan to integrate it in the future to make the platform fully functional.

BYTEUPRISE HTML, JavaScript, React.js, and Bootstrap

I developed a fully responsive ByteUprise using HTML, JavaScript, React.js, and Bootstrap. The project replicates the front-end design, including navigation, product listings, and interactive elements. While it currently lacks a backend, I plan to integrate it in the future to make the platform fully functional.
